

'TAKE OFF' INTO OROFACIAL MYOFUNCTIONAL THERAPY

2 Day Orofacial Myofunctional Therapy Course
for all Health Professionals

Sydney: 15th - 16th August 2020

For more details see myofocus.com.au/learn

Learn Orofacial Myofunctional Therapy (OMT) from 2 of Australia's most experienced myofunctional dentists

Dr Dan and Dr Donny have a combined experience of using Orofacial Myofunctional Therapy (OMT) of over 20 years. Not only have they learned the theory and practical aspects from the best OMT educators in the business. They have both successfully incorporated OMT into busy dental practices and know how hard it can be to make it work.

What they bring to the world of OMT education is direct experience of introducing successful OMT programs to no less than 7 practices between them. They know what works and what does not. With their "Take Off" program they have created a method which is easy to follow and highly effective.

You will learn over 50 different exercises and more importantly you will be coached on when to use each exercise while still keeping every OMT treatment plan bespoke for each patient. No patient is the same, and no ideal OMT plan is the same either. Therefore, you will learn how to tailor the plan according to clinical need.

Educational tools will include live demonstrations, videography and their unique 'Take Off' Algorithms which tell the user which exercises to use according to the specific overall muscular dysfunction of the patient at that moment in time. 'Take Off' Algorithms enable the practitioner to key in a specific code for the dysfunction and generate an appropriate treatment plan - so you will go away from this course with pre-made treatment plans which are written according to the patient's specific treatment need.

Dr Dan

Dr Donny

See overleaf for further information on these game-changing algorithms. We are taking OMT education to new heights!

Game-changing Algorithms

During this course you will learn how to:

1. Diagnose dysfunction
2. Create your code
3. Generate your plan
4. Begin OMT
5. Review progress
6. Reassess dysfunction
7. Create a new code
8. Continue OMT

You will be given 72 different treatment plans which correspond to 72 different dysfunction codes. The hard work is done for you. All you need to do is have the skill to diagnose the dysfunction and learn how to 'tweak' the plans as needed.

Example of Orofacial Treatment Plan Process:
