### WHY IS AN ONLINE VIDEO LIBRARY USEFUL?

Quite simply, your OM treatment will be more successful.

## How do we assist with compliance and technique?

If a patient forgets what the exercise looks like, they have an instant reminder without having to email you or call your office.

Directing your patients to a high quality online library provides credibility to what you are asking them to do. When they see others doing it, they can more easily see how valuable it is and it no longer seems like a strange thing to do.

The library is shot with real patients with real dysfunction. Therefore, their challenges when doing the exercises are visible. For some exercises, you can use their less than ideal technique to point out common mistakes made when performing the exercise and better coach the patient towards the exact technique that you as the practitioner have prescribed for them. In addition, through seeing the struggles of others, your patients will feel less alone and be more inspired to work through their own difficulties.

**Our online video library consists of over  
50 OMT exercises filmed in High Definition.  
We hope they will be as much use to you  
as they have been to us.**
